

AMENDMENTS TO THE CLAIMS

Claims 1-15. (Canceled)

16. (Currently amended) The window covering according to Claim [15] 22, wherein alternating internal ligaments are severed.

17. (Currently amended) The window covering according to Claim [15] 22, wherein all the internal ligaments are severed, except every fourth internal ligament is left intact.

18. (Currently amended) The window covering according to Claim [15] 22, wherein every fourth ligament is severed.

19. (Currently amended) The window covering according to Claim [15] 22, wherein one internal ligament is severed, an adjacent internal ligament is intact, the next adjacent internal ligament is severed, and the next adjacent three internal ligaments are intact, such severing pattern being repeated for successive cells of the structure.

20. (Currently amended) The window covering according to Claim [15] 22, wherein every third ligament is severed.

21. (Currently amended) The window covering according to Claim [15] 22, wherein all the internal ligaments are severed, except every third internal ligament is left intact.

22. (New) A multicellular window covering formed from an initial honeycomb structure having multiple columns of individual cells, the structure having external pleated sides on its opposite faces and a plurality of internal ligaments interconnecting such opposite faces at spaced intervals and serving as partitions between adjacent cells of different columns of cells, said window covering comprising:

a first set of severed internal ligaments spaced from each other in a repeating sequence along the height of the columns, and a second set of intact internal ligaments, said severed internal ligaments eliminating a plurality of individual cells of the initial honeycomb structure.
